Hiring Manager

Netflix

<https://explore.jobs.netflix.net/careers/job/790302912776>

Dear Hiring Manager,

I am writing to express my interest in the Machine Learning Engineer (L5) - Studio Media Algorithms position at Netflix. With a strong foundation in computer information science and a passion for machine learning, I am eager to contribute to Netflix's innovative approach to media search capabilities.

During my tenure as a Customer Sales Representative at HTL Freight, I honed my skills in coordinating complex logistics and collaborating with diverse teams to ensure efficient operations. My role required meticulous attention to detail and the ability to analyze multifaceted problems-skills that are directly transferable to developing and refining machine learning models.

My academic journey at ECPI University, with a concentration in Cyber and Information Security Technology, has equipped me with a solid understanding of data structures, algorithms, and security protocols. Additionally, obtaining the Nvidia Deep Learning AI certification has deepened my knowledge in neural networks and model optimization.

I am particularly excited about the opportunity to work on integrating Large Language Models (LLMs) to enhance media search capabilities at Netflix. The prospect of contributing to a platform that reaches millions worldwide aligns with my aspiration to apply machine learning techniques to real-world challenges.

I am confident that my blend of practical experience and academic knowledge makes me a strong candidate for this role. I look forward to the possibility of discussing how my background can benefit Netflix's mission to entertain the world.

Thank you for considering my application.

Sincerely,

Brad Blair
